

Step 1 : npm install --save vue-router

Step 2 : from **main.js**, add –

```
import { createRouter, createWebHistory } from 'vue-router';
```

then component gula ke import korte hobe,

```
import TeamsList from './components/teams/TeamsList';  
import UsersList from './components/users/UsersList';
```

then router ke implement korte hobe,

```
const router = createRouter({  
  routes: [  
    {  
      path: '/teams',  
      component: TeamsList,  
    },  
    {  
      path: '/users',  
      component: UsersList,  
    },  
  ],  
  history: createWebHistory(),  
});
```

And lastly app system e use korte hobe,

```
app.use(router);
```

Full main.js structure,

```
import { createApp } from 'vue';

import { createRouter, createWebHistory } from 'vue-router';

import App from './App.vue';

import TeamsList from './components/teams/TeamsList';
import UsersList from './components/users/UsersList';

const router = createRouter({
  routes: [
    {
      path: '/teams',
      component: TeamsList,
    },
    {
      path: '/users',
      component: UsersList,
    },
  ],
  history: createWebHistory(),
});

const app = createApp(App);
app.use(router);

app.mount('#app');
```

And lastly from **App.js** add,

```
<router-view></router-view>
```

Example code,

```
<template>
  <the-navigation></the-navigation>
  <main>
    <!-- <component :is="activePage"></component> -->
    <router-view></router-view>
  </main>
</template>
```
