Vue JS Parent to child communication

From parent component,

```
<Header title="Task Tracker"></Header>
```

From Child component,

```
<h1>{{ title }}</h1>
```

```
props: {
  title: {
    type: String,
    default: "Hello World",
  },
},
```

Vue JS Child to parent communication

From Child component,

```
<i @click="onDelete(task.id)" class="fas fa-times"></i>
```

```
methods: {
    onDelete(id) {
      this.$emit("delete-task", id);
    },
  },
```

From Parent component,

```
<Task :task="task" @delete-task="emiitedData"></Task>
```

```
methods: {
  emiitedData(id) {
    console.log(id);
  },
},
```
