Template refs

Normal snippet from <template>,

```html
<template>
  <input type="text" ref="name">
  <button @click="handleClick">Click me</button>
</template>
```

Now from **methods,** getting value of **refs,**

```js
methods: {
  handleClick(){
    console.log(this.$refs.name.value);
  }
},
```

Click event modifiers

```html
<div class="modal" :class="{ sale: theme === 'sale' }"
@click.right="$emit('showModal', false)">
```

Ekhane **.right** hocche event modifier.
